Nidderdale Pedigree Aberdeen Angus Herd - Calf Details November 2008

The registration of pedigree calves require that their names start with the same letter as their Mum. To avoid the complication of individual names, it is customary to keep the mum's name for all her female calves (heifers). We like this system as it reinforces the family name.

You will see that as our own experience with 3 daughters, our cattle have followed Garman family tradition. We have spoken with our new Bull Leo who assured us that he will put things right for the 2009 calving
